DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 8-10, 15 and 17, drawn to receiving an input signal and extracting a data signal from the input signal, classified in class 455, subclass 227.
 - II. Claims 5-7, 11-14, 16 and 18, drawn to combining a plurality of communication signals, classified in class 370, subclass 490.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as combining signals as opposed to invention I which is drawn to extracting data from a single input signal. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to David Hall on 8/5/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
